

Maximise Your Savings and Sustainability with Expert Wheel Alignments

A properly executed wheel alignment is not an added expense for your business; it's an investment that pays for itself. When done correctly, a wheel alignment can **reduce your annual tyre expenses by up to 30%**, often **doubling the lifespan of your front tyres alone!** Not to mention the savings on fuel and lowering of Emissions.

By using vehicle data such as make, model, mileage, and tyre type, we can analyse tyre consumption before and after alignment, similar to fuel efficiency assessments.

Our Expertise

For over 40 years, we have specialised in truck alignments, solving tyre wear issues across Australia. We innovate solutions for all imported vehicles and proudly stand as the largest truck alignment specialist in the country. Let us help you plan cost reductions and document your reduced carbon footprint ahead of time. Choose Big Wheels for wheel alignments that save you money, extend tyre life, and contribute to a greener planet.

How Big Wheels Truck Alignment can benefit you

1. **Significant Cost Savings:** The reduction in tyre replacement costs significantly outweighs the expense of the alignment process.
2. **Significant Time Savings:** We keep your drivers on the road for longer – no need to continuously change tyres
3. **Enhanced driver comfort and minimised driver fatigue:** Misaligned wheels can lead to driver fatigue. A proper wheel alignment eliminates constant steering correction, minimising driver fatigue and making your journey more comfortable.
4. **Reduced Carbon Footprint & Sustainability:** Over a year, this practice dramatically decreases your environmental impact, contributing to the sustainability of your business.

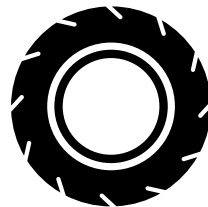

Australia discards 55 million tyres annually, and we are not even in the top ten globally. While there are ways to recycle old tyres sustainably, the best approach is to reduce usage in the first place.

Save Money

Save money by extending the life of your tyres.

Save Tyres, Time & improve Fatigue Management

Replace tyres less often saving drivers time and you money. Enhances on road comfort.

Save the Planet

Save the planet by reducing your carbon emissions and improving sustainability.

Enhancing Vehicles for Australian Roads Beyond Manufacturer Standards

FAQ: Is this covered by manufacturer warranty? In most cases, no.

Manufacturers use internationally recognised alignment methods that cater to all regions where their vehicles are sold. While they produce excellent vehicles, we enhance a vehicle's performance for Australian roads. Our extensive experience across the country allows us to address specific issues such as road train routes, high-turn-angle vehicle wear, and last-mile delivery vehicles.
